# HOUSE

Ready to build your dream house?  
It's simpler than you might think.

## Materials

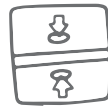

Scissors

Pencil

Sturdy  
cardboard

Hole punch

2 x star or surfboard  
connectorsThings to  
decorate with

(See 'Build your basics')

## What to do

**1**

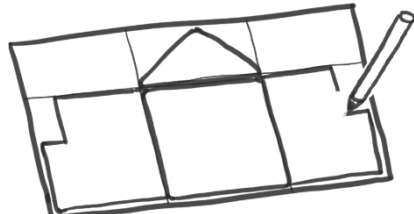

Before you begin, make some star or surfboard connectors. You'll find the instructions under 'Build your basics'.

Get a sheet of sturdy cardboard, like an old box.

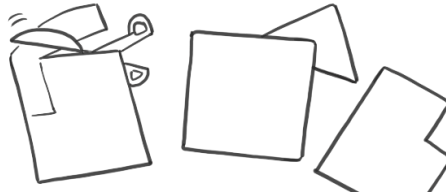

**2**

Draw the front, roof and two sides - making sure they'll all fit together. Mark on where slots will go like this.

**3**

Cut roughly around each piece to separate them. Then trim carefully up to the line.

**4**

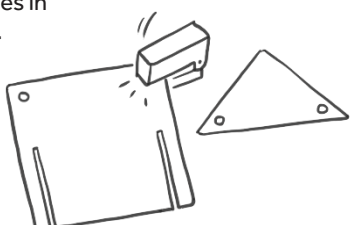

Cut in the thin slots. They should go about half way up.

Cut matching slots into the side walls.

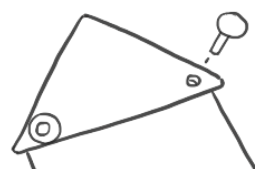

**5**

Use a hole punch to make holes in the corners of the front walls. Mark the same distance on your roof, and punch holes in the roof to match.

**6**

Line them up, and push through a connector. Remember to lock the connectors in place.

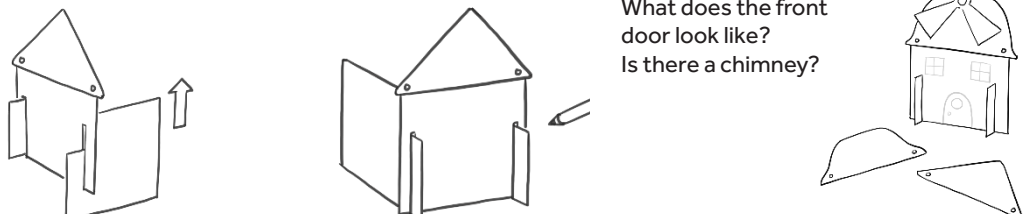

**7**

Use the slots to attach your sides.

Go town with details!

Who lives in your house?  
What does the front door look like?  
Is there a chimney?
